Care and Cleaning

Stainless Steel Sinks

- ◆ *General cleaning: use an ordinary mild detergent and soft cloth, rinse and towel dry.*
- ◆ *Steel soap pads should never be used; particles can adhere to a stainless steel sink surface and will eventually rust.*
- ◆ *Light scratches are normal for stainless steel sinks; over time they will blend into the uniform finish pattern.*
- ◆ *Do not use dish mats as these can trap soap and dirt making sink maintenance more time-consuming.*
- ◆ *We recommend the use of an Elkay bottom grid or rinsing basket to protect your sink.*
