

5 KEYS TO CONSIDER WHEN BUYING AUDIO / VIDEO FURNITURE:

1: ALL SPEAKERS REQUIRE SPEAKER STANDS FOR OPTIMAL PERFORMANCE:

Speaker stands dramatically enhance the acoustic performance of your loudspeakers. [Click here](#) for further information on proper speaker placement.

2: RECOMMENDED SPEAKER STAND HEIGHT FOR A SPEAKER:

The ideal height of the loudspeaker & speaker stand should place the tweeter at ear level when you are seated in a listening position. This height is typically 40" - 45" high. (i.e. if your speakers are 20" tall, the proper speaker stand would be 20" - 25" in height.)

3: FIXED SHELF STAND VS. MODULAR STAND - FOR YOUR COMPONENTS:

The importance is determined by your application need. A fixed shelf system is easy to assemble, has aesthetic appeal, and will hold today's contemporary stereo system. Purchasing a modular rack allows for additional components to be added in the future.

4: DO YOU REQUIRE NOW OR IN THE FUTURE A MATCHING AUDIO STAND FOR YOUR VIDEO STAND:

An item that is often overlooked. Most PLATEAU products are available in matching audio and video stands that together can create an impressive statement in a room. Be sure to view all of the PLATEAU products before making your selection.

5: KEY PRODUCT CONSIDERATIONS:

- Sufficient width of center areas, to accommodate center-channel speakers & components
- Built in ventilation on cabinetry
- Availability of Matching Speaker Stands for all Audio & Video Stands
- Ability to add casters
- Wire management to hide unsightly cables
- 1-price for any finish

Only PLATEAU products can meet all of these considerations. PLATEAU audio/video furniture is designed to be stylish, using natural woods and powder coated painted finishes that will last for years to come. When choosing audio/video furniture, see why PLATEAU is the right choice.

PLATEAU, offering quality audio / video furniture solutions for over 25 years.
