

COST SAVINGS & ENVIRONMENTAL BENEFITS

Built with nature in mind.

REDEFINING HAND DRYERS

- 🌿 **COST SAVINGS:** Warm air hand dryers will reduce your current paper towel or linen costs by 90%
- 🌿 **LABOUR REDUCTION:** It is estimated that every case of paper towel requires one hour of labour to fill dispensers and dispose of waste
- 🌿 **HYGIENE:** Hand dryers are rated the most hygienic of all drying methods (Mayo Clinic Study). Independent research by Innovaltech and S.M. Laboratories demonstrated a 30% reduction in aerobic bacteria compared to paper towels
- 🌿 **ENERGY USE:** A 10 second hand drying cycle uses half the energy of paper towels when towel production, packaging, and transportation are factored in
- 🌿 **CLIMATE CHANGE:** Drying hands with a warm air dryer produces up to 18 times less greenhouse gas than with paper towels, dramatically reducing your carbon footprint
- 🌿 **WASTE REDUCTION:** Paper towels end up in landfills because they cannot be recycled. Hand dryers comply with current and pending solid waste reduction legislation
- 🌿 **POLLUTION:** Up to 20,000 gallons of water are polluted to produce 1 ton of paper towel. Hand dryers fare better than paper towels by every key environmental measure
- 🌿 **ENVIRONMENTAL STANDARDS:** Hand dryers from Comac Corporation contribute to LEED and BOMA building certifications
