

INSTALLATION INSTRUCTIONS FOR
CC2RS1
LEG TUB FILLER RISER

Turn off your water supply, flush the line to remove clogs and debris in your plumbing lines, and empty water in your plumbing lines before installations

Make sure your inlets and outlets configuration work with the inlets and outlets of the risers

1. Apply a bead of any silicon based sealant around opening
2. Insert Leg Tub filler riser from top of deck
3. Secure by tightening with lock nut (supplied)
4. apply Teflon tape to male threads
5. connect supply line to bottom of riser making sure to maintain the orientation of riser towards the interior of the tub
6. Securely tight plumbing connection and make sure no leak developed.
7. Turn on water supply.
