## How big is the Sonoma 14 pergola?

It is 14' by 14' pergola. It is 9' 3" tall at its highest point.

*Outside Dimension:* 158" (pillar to pillar)

*Inside Dimension:* 145" (pillar to pillar)

*Center-to-center Dimension:* 151" (pillar to pillar)

*Pillars:* 6" square

*Height:* 9' 3" (center)

## What is the pergola made out of?

The pergola is constructed with Asian cedar wood. The stain on the wood contains as many UV inhibitors as possible, which slows down fading. The wood is also stained to ensure the best coverage.

## Does the wood fade quickly?

The pergola loses its stain at an average of 10 percent every year. We suggest staining every third year. Stain colors are very compatible and can be found at any paint store.

## Does it need to be fastened down?

All pergolas come with fastening devices and fastening is required.

## Does outdoor lighting come installed?

No, outdoor lighting is not installed, but may be hung from the pergola beams.

## What other options are available with this pergola?

We have optional side privacy walls for both the Sonoma 10 and 14 (SONOMA10-WALL, SONOMA14-WALL) and optional lattice roof panels (SONOMA10-LATT, SONOMA14-LATT ). There can be up to three privacy walls. The lattice roof panels are removable by "popping" them up from the underside. Decorative post bases also available.

## How is the pergola shipped?

- 1 crate for the pergola
- 4 boxes for a complete roof of 12 panels
- 1 box for 2 decorative post bases
- 2 boxes for the privacy wall

## Are the pergolas hard to assemble?

No! Two people can easily assemble them in about 3 hours!

## What is the warranty?

- 1 year warranty on exterior
