Item Description:	<p>Each shade in this stunning design is handcrafted from genuine fossil stone, which bears a striking resemblance to agate. Fossil stone is petrified wood, which has been embedded in the crust of the earth and permeated by minerals for millions of years. These fascinating and handsome stones blend natural earth tones and represent elements of our geological past. Each stone has been polished to perfection and distinctively placed to achieve a subtle gradation of color along the shade.</p>
