

Rigid Standoff with Connector

Shown approximately 20% actual size.

DESCRIPTION

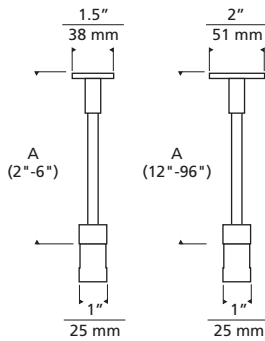

The field-cutable rigid standoff with connector is used to join sections of Single-Circuit T-trak™ together end to end while supporting the system. Order one for each connection point between single-circuit track sections. Use conductive type to continue power through connection. Use isolating type to isolate multiple circuits on one continuous run. Select the appropriate length to match the specified drop for the system.

FINISH

Antique bronze, satin nickel, white.

WEIGHT

0.55-2.95 lb./0.25-1.33 kg. ±
